PROFESSIONAL SUMMARY

Passionate Software Engineer specializing in Flutter development, AI-powered applications, backend systems, and scalable full-stack solutions. Experienced in building production-ready mobile apps, SaaS platforms, automation systems, and backend architectures using Flutter, Firebase, Python, FastAPI, Django, and REST APIs.

Previously worked as a Junior Flutter Developer and Captain of Team Systemica Intelligence at Beup Tech Agency, contributing to AI-powered applications, mobile systems, backend services, and automation workflows.

Skilled in clean architecture, scalable development, modern UI/UX, and performance optimization.

WORK EXPERIENCE

Junior Flutter Developer

November 20, 2025 – May 04, 2026

Captain of Team Systemica Intelligence — Beup Tech Agency

A Concern of Betopia Group

- Developed production-ready Flutter applications, AI-powered systems, and scalable mobile solutions.
- Led Team Systemica Intelligence, coordinating development workflows and project execution.
- Built clean, high-performance applications with modern UI/UX, scalable architecture, and optimized user experience.
- Worked with Firebase, REST APIs, automation systems, payment integrations, push notifications, and production deployments.

App Development with Flutter — Trainee, Ostad

July 2023 – June 2024

- Completed a 12-month intensive program (score 96.5/100, Pro batch).
- Built real-world apps integrating Firebase, Google Maps, and REST APIs.
- Collaborated in Agile teams using Git/GitHub workflows and reviews

Entrepreneur & Technology Lead — Family Electronics Business

2024 - Present

- Contributed to business operations, customer management, and daily coordination in a family-run electronics and electrical business.
- Helped modernize business processes through technology-driven solutions and better management practices.

EDUCATION

B.Sc. in Computer Science and Engineering

Graduated / December 2025

Daffodil International University

- CGPA: 2.90 out of 4.00

HSC (Science)

2020

Shahid Buddhijibi Govt. College, Rajshahi

- GPA: 5.00 out of 5.00

CORE SKILLS

Mobile App Development: Flutter, Dart, Firebase, Push Notifications, Supabase, Payment Integration, SQLite/Hive, Google Maps, Mapbox, App Performance Optimization.

Backend Development: Python, FastAPI, Django, Firebase Functions, RESTful API Development, Authentication & Authorization, Cloud Firestore, API Integration & Automation Systems.

AI & Automation: AI-Powered Applications, AI Workflow Automation, AI Agent Integrations, AI-Assisted Product Development, Intelligent SaaS Systems.

Architecture & State Management: Clean Architecture, Riverpod, Provider, GetX, MVC / MVVM, Modular Code Structure.

UI/UX, No-Code & Animation: UI/UX Design Knowledge, Advanced Flutter Animations, No-Code & AI-Assisted Platforms (Lovable and similar tools), Product Prototyping & Rapid MVP Development.

Web & Full-Stack Development: Intermediate Knowledge of React.js & Next.js, Firebase Auth, Responsive Web Applications.

Deployment & Distribution: Apple App Store Deployment, TestFlight Distribution, Google Play Store Publishing, Vercel Deployment, Render Deployment, Production Build Optimization.

Tools & Workflow: Git & GitHub, Postman, VS Code, Android Studio, Figma, Agile / Scrum, Debugging & Performance Profiling.

PRODUCTION PROJECTS

Kick360 – AI-Powered Sports Platform

Tech Stack: Flutter, FastAPI, Django, Firebase Cloud Messaging (FCM), React.js, Shopify Integration, Render Deployment.

- Developed a complete AI-powered sports ecosystem including a Flutter mobile app, AI-assisted Shopify code generator backend, and responsive admin dashboard with real-time features, automation workflows, analytics, authentication systems, and scalable architecture.

Qari 24/7 – AI-Powered Quran Learning App & Admin Dashboard

Tech Stack: Flutter, Django, OpenAI, Firebase Cloud Messaging (FCM), React.js, Stripe Payment Gateway.

- Developed an AI-powered Islamic learning application with modern UI/UX, real-time features, and scalable mobile architecture.

AI Reservation & CRM Automation System

Tech Stack: React.js, PostgreSQL, FastAPI, LangChain, ChromaDB, OpenAI, Stripe Payment Gateway, Render Deployment.

- Developed AI-powered backend and automation systems including reservation workflows, CRM calling automation, secure APIs, authentication systems, and intelligent business process integrations.

Khazna – Finance Tracking Ecosystem

Tech Stack: Flutter, Django, Firebase Cloud Messaging (FCM), React.js, Stripe Payment Gateway, Render Deployment.

- Developed a complete finance tracking ecosystem including a Flutter mobile application and scalable backend services with optimized workflows, secure APIs, modern UI/UX, and cross-platform support for mobile and web systems.

Epic NZ Travel App – AI-Based Travel Platform

Tech Stack: Flutter, REST APIs, Python, Node.js, Mapbox, Firebase Cloud Messaging (FCM), Stripe Payment Gateway.

- Built an AI-assisted travel application with maps integration, responsive UI, animations, and scalable mobile workflows.

Uzzamax Live Streaming App

Tech Stack: Flutter, REST APIs.

- Developed a scalable live-streaming application with real-time interactions and optimized mobile performance.

CERTIFICATIONS & TRAINING

Flutter App Development: Ostad (96.5/100)

Flutter Advanced: State, Design & Architecture

Digital Marketing: ABCL IT (6 months)

Build Your Own AI Agent: NetCom Learning Bangladesh

ACHIEVEMENTS

- Built and deployed production-ready applications across AI, EdTech, SaaS, automation, and eCommerce sectors.
- Led multiple development projects involving Flutter apps, backend systems, AI integrations, and automation workflows.
- Successfully completed multiple real-world production software projects within the last 5 months.
- Recognized for strong communication skills, leadership, rapid learning, and problem-solving mindset.
